

Business Profile

1978 – 2023* 2024 2025

**ENGINEERS
CONSORTIUM
LIMITED**

Since 1978

Engineers Consortium Limited is an organization with its roots down from the very emergence of Bangladesh. The organization grew in a surrounding of war razed economy with its objective to serve the country by rendering the whole range of consultancy services including feasibility study, planning, architectural, structural, electrical, aquaculture, agricultural engineering, hydrological engineering etc. With time, **ECL** harmonized its steps with the development of Bangladesh & obtained its present status as one of the renowned consulting firms in Bangladesh.

The secret of our success is our belief in extra touch, sense, dimension and practice. It distinguishes us as well as enables us to prepare for the days to come with the good will of our well-wishers and patrons.

Vision

A self-reliant, peaceful and resilient world supported by adequate and sustainable protocol and infrastructure

Mission

To provide fitting solution to people and organizations harmonized with a contemporary general framework designed for achieving our vision

Goal

To achieve and sustain relentless, ambitious and realizable development for retaining our DNA with the spirit, agility and perseverance of a Start-up

WHY ECL?

Responsibility

We take over the problem from the client. The problem itself is the assignment, not just the contract. We have observed over our almost half a century lifespan that the client himself does not fully comprehend the problem at most times. It is our job to find all the pieces of the puzzle and solve it so diligently that it should not appear again within the lifespan of the solution and we strive for stretching that lifespan too.

Right Approach

It is the approach that distinguishes the winner. We constantly enrich our approach of services in harmony with the ever-evolving world. Our Knowledge Capital is enriched with every encounter we make with our clients. We believe that the contribution of the client is not made by his payments but by his comments on our service. It is our experience that sets our approach.

Vast Experience

For almost half a century, we have been delivering consulting services mostly to the Public Development Sector. We have been accumulating what we have encountered every day for the past half a century. We have built up a knowledge capital where the experiences are recorded, analyzed and ready for incorporating into our practice.

Culture

Every organization is distinguished by the culture it promotes. We at ECL cherish the people; everyone who works with us, who we work for and who are benefitted or even impacted by our work. We look after people so that they, in turn, shall look after us. People are the key to every organization in the service industry. We measure our achievement not by the revenue or the innovation we make but by the way we empower and care for people. The health of the relationship we have with people is the key to our prosperity.

Tools

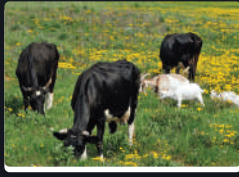

We are geared with State-of-the-art IT enabled equipment and software managed by a cloud network. We are connected, equipped and synchronized at all times. The process of data collection, recording, distribution, analysis, design and delivery is constantly getting better with the blessing of leading edge technology and respective innovation.

Method

Process centered yet unshackled operation makes it clear and simple to both the clients and us with well-defined accountability and manifold solutions to all contingencies. We have a method for everything.
